

EMS5 Call Director

The Janus EMS5 Call Director connects up to 8 EMS emergency telephones to a single telephone line, helping reduce operating costs. It incorporates "Force-thru calling" to ensure that operators are alerted to emergency calls from all connected devices all the time.

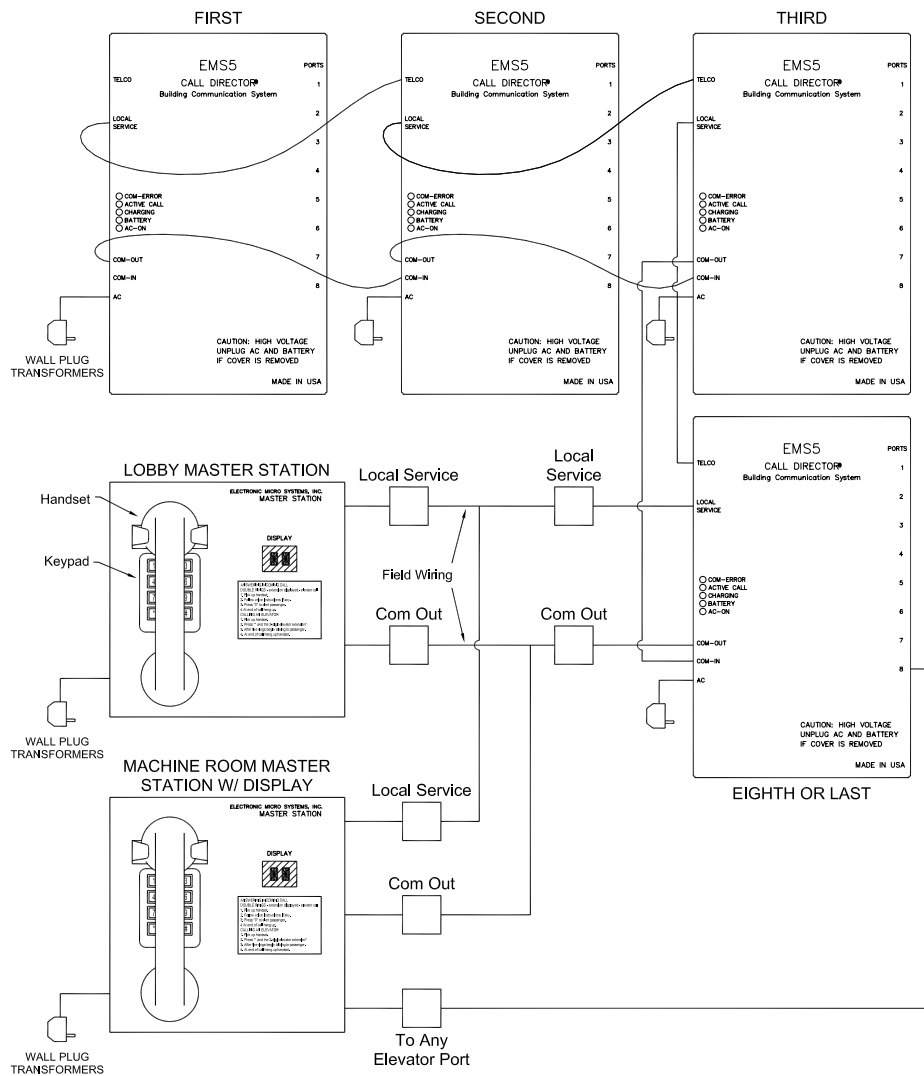

Multiple EMS5 Call Directors can be connected together, allowing up to 64 telephones to share a telephone line. It can also be used as a stand-alone intercom system for communication within a building without a telephone line.
