

E-Motive Hall Lanterns & Gongs

Product Datasheet

E-Motive's range of gongs and hall lanterns are fully compatible with our LCD and LED display products.

The gongs and hall lanterns provide an audio and visual indicator to announce elevator arrival and intended direction of travel. These cost-effective, easy-to-fit solutions ensure that your elevator complies with barrier-free accessibility codes and standards.

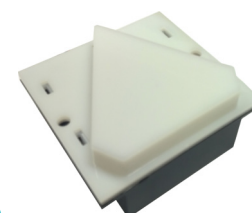

Jewel Hall Lantern

- + Uniquely shaped opaque, semi-translucent or in "glass effect" acrylic arrow
- + 12mm arrow depth allowing 180° viewing angle
- + Available in 50mm and 70mm arrow height
- + Direct input trigger at 24VDC

New

Opaque Hall Lantern

- + Uniquely shaped opaque, milky white acrylic arrow with back box
- + 10mm arrow depth allowing 180° viewing angle
- + 70mm arrow height
- + Direct input trigger at 24VDC

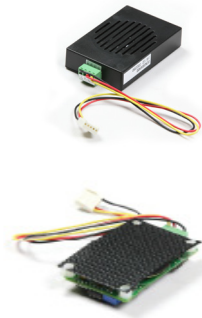

Key Features

- + Dual colour Hall Lantern illumination: green-light for up, red-light for down
- + Custom colour Hall Lantern illumination is available upon request
- + Can be used in combination with E-Motive LCD and Dot Matrix Products
- + Meets requirements of EN81-70 and ADA for landing signals

Gong

- + One sound for up, two sounds for down
- + Adjustable volume
- + Available in 2 design profiles
- + Box design offers additional protection in PVC box,
- + Slimline design easily fits into any fixture
- + Direct input trigger at 12-24VDC

The Slimline Gong is available in Serial version, used with E-Motive Encoder or Converter, when direct input trigger is not available or to receive signal input trigger from serial elevator controller.
