

SPECIFICATIONS

- Includes software (RP7700067A) and modem (RP7700067)
- Requires analog or IP line run to the modem to allow software to call out and check phones
- Requires an analog or IP phone line run to each RATH® SmartPhone. When connecting SmartPhones to our Command Center, they only require a single analog or IP line to allow for supervision.
- Schedule how frequently the software checks the phones
- If a phone does not register back to the software, it will send an alert to multiple email addresses

***Ensure all emergency phones are functioning properly before an emergency.
Stay prepared with RATH's Supervisory Software.***
